

10 AI Automations Every Creator Should Build

A practical guide for creators, founders, ministries, and small teams.

1. Content Planning Automation

Use AI to identify content gaps and generate content ideas.

2. Article Generation Workflow

Create first drafts while keeping human editorial review.

3. Newsletter Automation

Convert articles into newsletters automatically.

4. Social Media Repurposing

Turn long-form content into social posts.

5. Lead Magnet Funnel

Exchange valuable resources for email subscriptions.

6. Subscriber Growth Tracking

Monitor acquisition and engagement metrics.

7. Analytics & Reporting

Generate dashboards and executive reports.

8. Publishing Automation

Schedule and publish approved content.

9. Customer Follow-Up Automation

Nurture leads through automated email sequences.

10. Business Intelligence Dashboard

Unify content, audience, and growth data.

Implementation Roadmap

Start with one automation, measure the outcome, then expand gradually.
